TECHNOLOGY & MAINTENANCE COUNCIL

TURNING EXPERIENCE INTO PRACTICE

April 15, 2023

Dear Trucking Industry Professional:

The Technology & Maintenance Council (TMC) invites you to join us for TMC's 2023 Summer Conference & Fleet/Utility Forum, to be held in collaboration with EPRI on June 20-21 at the Renaissance Washington, D.C., Downtown in Washington, D.C. The event will be co-located with the 2023 Summer Meeting of ATA's Technical Advisory Group.

TMC is hosting this event in cooperation with EPRI based on input from both organizations' members who have expressed a need for targeted, focused education on the challenges surrounding power generation transmission, distribution, and system cybersecurity associated with onboarding electric vehicles. During this conference, TMC and EPRI will present sessions on electric vehicle specification, performance and rollout plans, as well as fleet user deployment strategy and status updates, with particular focus on fleet experiences with performance, infrastructure and operational challenges. We'll also hold sessions covering the electrification planning process based on utility capabilities and capacities, as well as present case studies from the fleet-utility perspectives.

The conference will also address important cybersecurity concerns with electric vehicle operation, discuss emerging standards, review policy and regulatory issues and present the latest information on EPRI's EVs2Scale2030 Initiative.

For details, review our meeting brochure, visit TMC's website — <http://tmcsummer.trucking.org> — or call TMC offices at (703) 838-1763.

I encourage you to take advantage of this opportunity and join us at TMC's 2023 Summer Conference & Fleet/Utility Forum. We look forward to seeing you in Washington!

Sincerely,

Robert Braswell
TMC Executive Director
